SUBJECT: REFERENCE FOR AQUILINA WAWIRA MWANDIKO

This is to certify that the above named was an employee of Howard Humphreys (East Africa) Limited. She served the company in the position of CAD Technician moving up the rank to Senior CAD Technician from 11th June 2007 to May 2017.

Throughout that period, Aquilina proved to be capable, hardworking and committed to the attainment of company goals and objectives. She successfully carried out her responsibilities on the projects assigned to her.

During the period that she worked with us, we found Aquilina to be diligent and conscientious in her duties and would have no hesitation in recommending her to a future employer who would require her services.

Yours faithfully

To WHOM IT MAY CONCERN

Dear Sirs/ Madams,

ACADEMIC REFERENCE FOR MS. AQUILINA WAWIRA MWANDIKO

I am writing this academic reference for Ms. Aquilina Mwandiko who is applying for a job search visa.

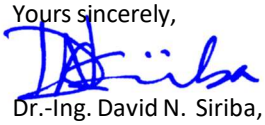

Aquilina was my student between Sept. 2016 and Sept. 2019 studying for a Master of Science degree in Geographic Information Systems (MSc. GIS). During this time, I interacted with her during class work activities, lectures, and final thesis presentations and defense. I got to know her personally and also through observations from my teaching assistants for her good character, hard work and academic abilities. Her thesis titled "*Use of Climate and Geospatial data for run-off projections in Nairobi County*", was one of the best. The study was about the evaluation of run-off trends in Nairobi watershed in the period 2000 to 2017 and the impacts of anticipated climate change on flow patterns in the periods 2018 to 2045 using the Soil Conservation Service Curve Number (SCS-CN) Method, a tool developed by the Natural Conservation Service of the U.S department of Agriculture. She graduated in September 2019 with a mean score of B (GPA 3.0).

With several years of post-graduation experience and a strong background working with the United Nations in Africa, Aquilina has developed expertise in GIS, Data Science, and digital transformation to address climate change and engineering challenges. She informed me that she is currently pursuing an online/hybrid MBA, further enhancing her skills in strategic decision-making, leadership, and business management while balancing her professional commitments. In addition to her international experience, she is also an entrepreneur, initiated a startup, Land & Space Tech Engineers, which demonstrates her ability to drive innovation, manage projects, and adapt to dynamic work environments.

Having pursued my PhD in Germany, I am well aware of the high standards and expectations in the German academic and professional sectors. Based on my experience, I have no doubt that Aquilina has the competence, adaptability, and expertise to thrive in the German job market. She is highly independent, analytical, and solution-driven, making her well-suited for roles in corporate multinational organizations, private companies, startups, NGOs, and research institutions. Furthermore, she is also fluent in English enabling her to integrate effectively into an international work environment. I strongly believe she would be a valuable asset in the German job market and would not hesitate to recommend her for a job in industry, research, or academia. I hope this reference, along with others, will sufficiently support her application.

Feel free to contact me if further information is required from this recommendation.

Yours sincerely,

Dr.-Ing. David N. Siriba, MISK (LS)

Senior Lecturer, Department of Geospatial & Space Technology

University of Nairobi
